

# CORONAVIRUS SAFETY MEASURES

## COVID-19 Secure – Safety is our Utmost Priority

The ETUK & Ireland Instructor team are looking forward to welcoming students back to Practitioner training workshops from October, 2020.

We have spent the last few months working on measures that are based upon guidance from the Government and our Professional Association body, Complementary Health Professionals (CHP). All our measures are designed to keep everyone in attendance safe, whilst still delivering the same high standard of training in a relaxed and comfortable manner. Each training venue has been risk assessed and actions implemented to ensure its suitability as a safe COVID-19 training space.

We are all in this together and it's everyone's responsibility to keep themselves and others in the class safe. We are an EMMETT family who are COVID-19 safe. Below is a summary of what to expect.

### **BEFORE CLASS**

- All touch points and surfaces will have been disinfected.
- Rooms will have been ventilated.
- Hygiene information signage will have been erected.
- Students will have been sent workshop COVID-19 safety protocols and what to bring.
- Students will have signed a COVID-19 Declaration and NHS Test & Trace permission form. (Anyone answering yes to any question on the COVID-19 Declaration will not be permitted to attend the class, they will be told to go home and order a COVID-19 test).
- Students will enter the classroom with sanitised hands and with their mask in place.

### **DURING CLASS**

- Mask and visors will be used by all participants.
- Massage tables will be spread apart and 2 students will sit at each end for theory learning.
- Students will stay and work at the same massage table in the same pairs for the entire workshop (3 if uneven numbers).
- Hands will be sanitised before and after each demonstration and practice session.
- Massage table and bolster will be disinfected after each demonstration and practice session.
- Students will use their own couch fabric or roll for practicing (with no sharing of coverings).
- The room will be ventilated with open windows or doors.
- All belongings will be stored in large plastic closable bags to minimise contamination.

### **AFTER CLASS**

- All touch points and surfaces will be disinfected.
- Room continued to be ventilated as the disinfecting procedures are taking place.
